

ANNEX

uant to written request submitted by Energotehnika Južna Bačka on 02.10.2014. and in accordance with the approval obtained from the World Bank, **ACTION PLAN MITIGATION AND MONITORING OF ENVIRONMENTAL IMPACT DURING IMPLEMENTATION OF THE PROJECT OF PUMPING OUT WATER AND SILT AT OPEN PIT MINE TAMNAVA – WEST FIELD, MB KOLUBARA** is amended in item 1 of Mitigation Action as follows:

Item	Location where applied	Subject	Mitigation Action	Responsible Person
1	At the pumping stations and wherever diesel and other oil products are used	Protection of soils and water against contamination	Storage of fuel and oil/lubricants will be at the maximum distance from water as is feasible, and there will be an embankment or other barrier between any tank or storage container and the water so that any leaks cannot reach water. The Contractor must remove any tanks or other storage vessels as soon as they are no longer needed.	Contractor
